### **Do you like the internet and people?**

If YES x 2, you're the right person in the right place! :)

Restaumatic.com is an innovative online ordering system for restaurants. Our solution is provided in two versions, the first as a professional website and the second as an Active Menu (just the system with a plug-in implemented into the existing website).

No other solution matches our service! In Poland it took us just 2,5 years to convince 1500 restaurants to join us!

#### **These are some examples of our implementations:**

Our dynamic development and growth led us to open our branches in UK and Czech Republic.

In October 2017 we launched our company to the Romanian market and now we are looking for help in conquering it! Become a part of our team!
