

ST.GALLEN SYMPOSIUM

AT A GLANCE

Founded in 1969, the St. Gallen Symposium is the world's most longstanding platform for **cross-generational dialogue**. We work towards our vision for decision-makers to "Lead with the next generation in mind" through dialogue formats around the globe and our main conference each May in St. Gallen, Switzerland. The St. Gallen Symposium is driven by a team of students from the University of St.Gallen, supported by dedicated professionals.

50+
years of history
5-6 MAY 2022

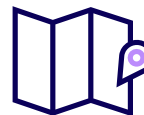

UPCOMING TOPIC

Collaborative Advantage

In an increasingly interdependent world, collaboration between businesses, governments, and across generations is more needed, but also more contested than ever. With intergenerational frictions on the rise, the 51st St. Gallen Symposium will explore current dilemmas and new, more impactful models of collective action to address our shared challenges.
